

It's not just  
a handle, it's a

### *Option one*

The 'with-key' option can be used in the same way as standard door handles, with the added Lock Lock switch protection.

### *Option two*

The 'keyless' option is perfect for doors that you never lock from the outside. Police approved security with seamless looks and simplicity.

Lock your door with a key  
or go keyless, either way...

On both the 'with-key' and 'keyless' options the internal switch locks the door spindle. If the spindle can't turn the door can't open.

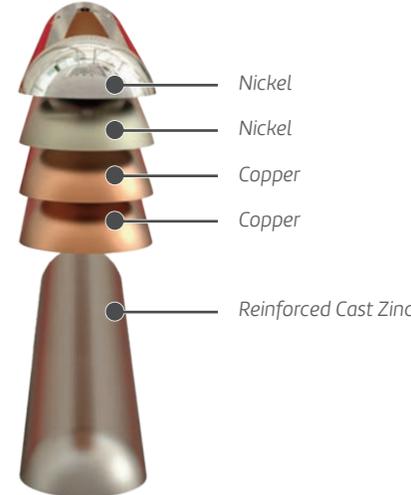

...**lock lock** it with  
the internal switch.

# Weather protected. Again and again and again.

There are 2 layers of nickel and then 2 layers of copper on every highly-polished Lock Lock handle. This is why it performed well beyond the highest weather rating standard (grade 5) on a TS007 salt spray test. Looking great and for longer.

# A NEW HANDLE ON LOCKING

9 ways that Lock Lock protects where handles don't.

## Curved design

Hard to grip and tear off

## Sacrificial spindle

Stops entry from forcing the lever

## Spindle knuckle

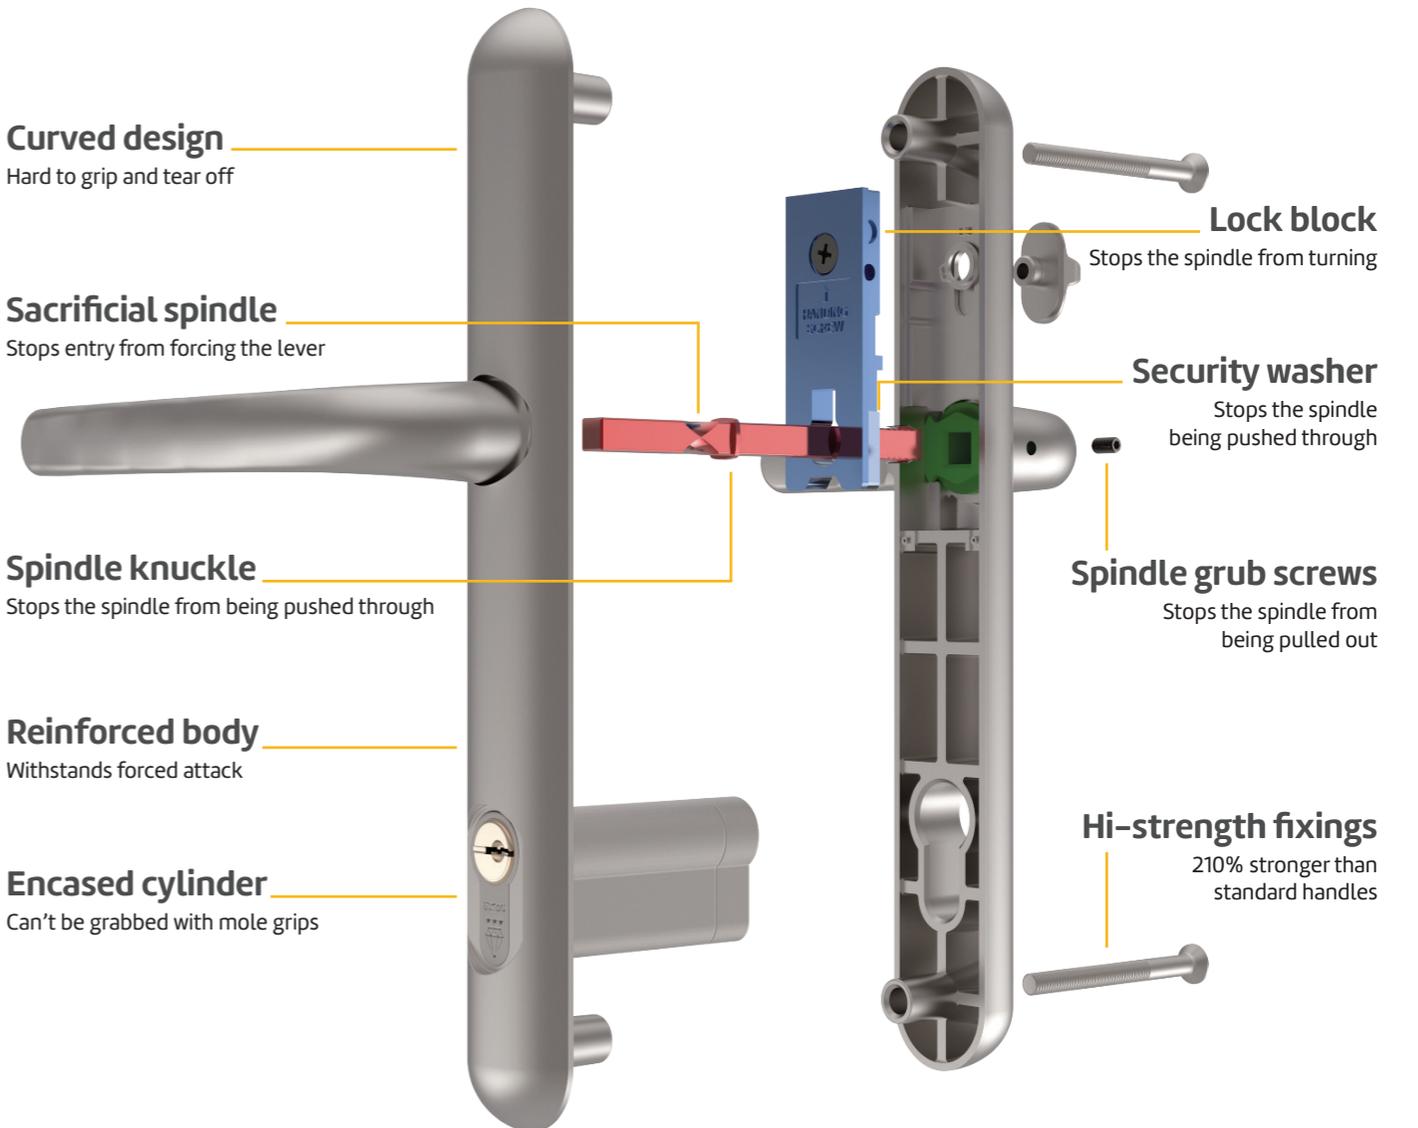

Stops the spindle from being pushed through

## Reinforced body

Withstands forced attack

## Encased cylinder

Can't be grabbed with mole grips

# PROTECT WHAT MATTERS

## Key hunt not required

### An easier way to lock lock your door

Just lift the handle and flick the switch to secure your home from inside. No more late night key hunts when you're tired and just want to get to bed!

### Emergency safe

There's an emergency and you need to get out of the house. Fast. What's the last thing you want to be doing? Searching for keys.
